

List of Dutch trains/vehicle mods

Dutch Vehicle List

This is an overview of all dutch mods available for train-fever. This list includes all vehicles that are owned by dutch companies/run in the Netherlands. By clicking on the name of the mod, you go to the download page of the mod. This lexicon entry has been made to avoid duplicate mods and as a handy overview for people that are interested in dutch mods.

Always credit the developer of the mod. Note that indented mods are repaints of the original mod above, hence model credits are not given in this case since they are already mentioned above the mod in question. However, in case the mod is a repaint of a non-dutch mod, double credits are given in this case.

Provide the original name (e.g. 1600, Plan T, Mat'64) as well as the operator (NS, NS Cargo) for ease of use.

Deep linking (i.e. leeching) is not allowed! Always link to the download page for the mod.

Feel free to edit and expand this list. Always provide credit where it's due. 👍

Steam Locomotives

- No steam locomotives available yet -

Diesel

Diesel Locomotives

- [Railion BR 232, repaint by Jo_Vink \(model by wohlstandskind\)](#)

Diesel Multiple Units

- [NS Mat '34 "DE3" by Oppie](#)
